Enterprise Risk Management (ERM) Software
(continued)

Enterprise Risk Management (ERM) Software Definition

Enterprise risk management (ERM) software helps businesses mitigate risk to minimize financial, legal, and all other liabilities. Companies use ERM software to define, implement, and monitor company-wide strategies for risk management. Also known as GRC Platforms, this type of software covers multiple types of risks: financial, hazard, strategic, and operational. Features of ERM software include organizing and evaluating risk information, tracking company-wide incidents, and providing various tools for measuring risk factors and modifying operations to comply with policies and regulations. This type of software is used mostly by compliance officers, analysts, and managers. Operations teams within an organization utilize ERM software to maintain the integrity of their company and avoid scenarios such as lawsuits, investigations, and injuries.

ERM software should not be confused with cybersecurity software, which focuses on security and privacy and does not cover other risks. Our security compliance category includes solutions that help companies document compliance with security frameworks and pass security audits. This type of software integrates with environmental, quality, and safety management software for industries such as retail and manufacturing. The three ERM components—governance, risk, and compliance—impact the organization and reveal valuable information to the other two. Vendors typically package the best GRC software and ERM platforms as a whole to deliver these collective benefits to the user.

To qualify for inclusion in the Enterprise Risk Management (ERM) category, a product must:

▶ Catalog, assess, and mitigate business-specific risks such as financial or health and safety

▶ Provide tools to communicate risks to employees, customers, vendors, and suppliers

▶ Create, maintain, and implement corporate policies and rules for internal and external use

▶ Maintain an up-to-date repository of laws, regulations, and industry standards

▶ Help users plan, implement, and track the performance of audit programs and tasks

▶ Ensure business continuity management through incident management and risk mitigation

▶ Deliver training and learning for compliance purposes, including certifications

▶ Perform third-party, vendor, and supplier risk assessments and due diligence

▶ Support multiple risk management methodologies, such as quantitative and qualitative

▶ Gather and analyze environmental, social, and governance (ESG) data from various sources

Enterprise Risk Management (ERM) Software (continued)

Enterprise Risk Management (ERM) Grid® Scoring Description

Products shown on the Grid® for Enterprise Risk Management (ERM) have received a minimum of 10 reviews/ratings in data gathered by February 25, 2025. Products are ranked by customer satisfaction (based on user reviews) and market presence (based on market share, seller size, and social impact) and placed into four categories on the Grid®:

▶ Products in the Leader quadrant are rated highly by G2 users and have substantial Market Presence scores. Leaders include: AuditBoard, Workiva, Scrut Automation, Hyperproof, Fusion Framework System, Sprinto, LogicGate Risk Cloud, Ncontracts, Camms GRC, and Protecht

▶ High Performing products have high customer Satisfaction scores and low Market Presence compared to the rest of the category. High Performers include: Onspring, Compyl, Pirani, Essential ERM, SimpleRisk, StandardFusion, Ostendio, and VComply

▶ Contender products have relatively low customer Satisfaction scores and high Market Presence compared to the rest of the category. While they may have positive reviews, they do not have enough reviews to validate those ratings. Contenders include: IBM OpenPages, NAVEX One, Resolver, Diligent One Platform, formerly HighBond, Oracle GRC, SAI360, Ideagen Risk Management, ServiceNow Integrated Risk Management, OneTrust Tech Risk & Compliance, SAP Risk Management, SAS Governance and Compliance Manager, and Archer

▶ Niche products have relatively low Satisfaction scores and low Market Presence compared to the rest of the category. While they may have positive reviews, they do not have enough reviews to validate those ratings. Niche products include: ZenGRC, SureCloud, LogicManager, and Acuity Risk Management

Grid® Scores for Enterprise Risk Management (ERM) Software

The table below shows the Satisfaction and Market Presence scores that determine product placement on the Grid®. To learn more about each of the products, please see the profile section.

Acuity Risk Management	14	37	10	23

* Products are ordered by G2 Score. Satisfaction score is used as a tiebreaker if two products have the same G2 Score.

Grid® Methodology

Grid® Rating Methodology

The Grid® represents the democratic voice of real software users, rather than the subjective opinion of one analyst. G2 rates products from the Enterprise Risk Management (ERM) category algorithmically based on data sourced from product reviews shared by G2 users and data sourced from third parties.

Technology buyers can use the Grid® to help them quickly select the best products for their businesses and to find peers with similar experiences. For sellers, media, investors, and analysts, the Grid® provides benchmarks for product comparison and market trend analysis.

Grid® Scoring Methodology

The Grid® Report for Enterprise Risk Management (ERM) | Spring 2025 is based on reviews collected through February 25, 2025. We apply unique algorithms to this data to calculate Satisfaction (v4.0) and Market Presence (v7.0) scores for the Spring 2025 report quarter. To view the Enterprise Risk Management (ERM) Grid® with the most recent data, please visit the Enterprise Risk Management (ERM) page. For more details on Grid® Scoring, please view the G2 Scoring Methodology here.

Grid® Categorization Methodology

Making G2 research relevant and easy for people to use as they evaluate and select business software products is one of our most important goals. In support of that goal, organizing products and software companies in a well-defined structure that makes capturing, evaluating, and displaying reviews and other research in an orderly manner is a critical part of the research process.

To manage the process of categorizing the software products and the related reviews in the G2 community, G2 follows a publicly available categorization methodology. All products appearing on the Grid® have passed through G2's categorization methodology and meet G2's category standards.

Many terms that appear regularly across G2 and are used to aid in product categorization warrant a definition to facilitate buyer understanding. These terms may be included within reviews from the G2 community or in executive summaries for products included on the Grid®. A list of standard definitions is available to G2 users to eliminate confusion and ease the buying process.

Rating Changes and Dynamics

The ratings in this report are based on a snapshot of the user reviews and third-party data collected by G2 up through February 25, 2025. The ratings may change as the products are further developed, the sellers grow, and as additional opinions are shared by users. G2 updates the ratings on its website in real time as additional data is received, and this report will be updated as significant data is received. By improving their products and support and/or by having more satisfied customer voices heard, Contenders may become Leaders and Niche sellers may become High Performers.

(Grid® Methodology continues on next page)

Grid® **Methodology** (continued)

Trust

Keeping our ratings unbiased is our top priority. G2 follows defined community guidelines to ensure privacy, and authenticity for users and reviews. For more details, please view the G2 Community Guidelines here.

Grid® Inclusion Criteria

All products in a G2 category that have at least 10 reviews from real users of the product are included on the Grid®. Inviting other users, such as colleagues and peers, to join G2 and share authentic product reviews will accelerate this process.

If a product is not yet listed on G2 and it fits the market definition above, then users are encouraged to suggest its addition to our Enterprise Risk Management (ERM) category.

Product Profiles

Product profiles and detailed charts are included for products with 10 or more reviews.

AuditBoard

**4.6** ★★★★½ **(1,248)**

SPRING 2025
Grid Leader

AuditBoard has been named a Leader based on receiving a high customer Satisfaction score and having a large Market Presence. AuditBoard received the highest Satisfaction score among products in Enterprise Risk Management (ERM). 99% of users rated it 4 or 5 stars, 97% of users believe it is headed in the right direction, and users said they would be likely to recommend AuditBoard at a rate of 94%. AuditBoard is also in the Security Compliance, Third Party & Supplier Risk Management, Regulatory Change Management, Audit Management, IT Risk Management, and Environmental, Social, and Governance (ESG) Reporting categories.
